

## DATA SHEET

### MULTI BROOM

The JP MULTI BROOM is suitable for cleaning any surface, both indoors and outdoors. The head of the broom consists of cleanable rubber bristles. The rubber bristles are v-shaped and facing inwards on all sides. This allows you to collect dirt and dust from any angle.

The broom head has a rubber lip that allows you to clean up liquid messes, such as water and other fluids. Additionally, the MULTI BROOM head attaches to the same aluminum pole that you can find in the MULTI HERO cleaning system, allowing for space saving and versatility.

The head attaches via a single joint that is adjustable, you can fix this joint at any incline parallel to the pole. This allows you to clean tall surfaces. The pole itself is adjustable to up to 1.8 m (nearly 6 feet) as well, allowing you to clean in a comfortable, back-friendly manner.

The MULTI BROOM comes with a dust pan that conveniently attaches to the pole of the broom.

This dust pan has a sharp rubber edge that allows you to pick up all the dirt and dust you are sweeping into it. Additionally, the comb on the back end allows you to clean the bristles in to the pan as you go. The handle of the pan has a slot for your foot that allows you to move the pan around while sweeping without repeatedly bending over, saving you energy and preventing discomfort. The JP MULTI BROOM is an innovative and well designed cleaning system that will change the way you clean!

### EXAMPLES OF USE

JP MULTI BROOM can be used for all surfaces, both indoors and outdoors.

### TIP

Adjust the pole to about nose height for perfect back-friendly cleaning.

### CLEANING INSTRUCTIONS

All parts of JP MULTI BROOM are washable.  
Wash the bristles with water.
