

DATA SHEET

MULTI HERO

The ultimate JP cleaning device for floors, ceilings, walls, and many more.

PRODUCT FEATURES

This versatile and durable cleaning device consists of a wide trapezoidal aluminum plate with Velcro strips, which connects to the adjustable aluminum pole via a double-hinged joint. The lower joint, adjustable via the turning wheel, allows you to fix or loosen the incline of the wiping plate at any angle parallel to the pole.

The knob above this is used to lock the second hinge joint at any angle perpendicular to the pole. These features allow you to comfortably clean many different surfaces at various heights and inclines.

The trapezoidal wiping plate has been designed to clean with optimal pressure distribution across the entire surface and to reach deep into corners and under furniture. Depending on the cleaning needs, different JP fibers can be attached to the Velcro strips of the wiping plate.

JP MULTI HERO is light and handy, allowing easy and effective cleaning for all large surfaces. For the protection of your possessions, the side edges of the wiping plate are trimmed with plastic. Being light-weight and having a fixable wiping plate, this device is perfectly suited for cleaning ceilings, walls, and other tall or vertical surfaces.

Additionally, the wiping plate has two clips located on the top surface of the plate that allow you to attach other cloths of your choosing not specifically designed for this cleaning system. Also important to note, this cleaning device is rustproof.

FIELDS OF APPLICATION

JP MULTI HERO can be used for large surfaces both indoors and outdoors. Whether for cleaning or maintaining floors, tiled walls, wooden ceilings, conservatories, shop windows and much more - this device can be adapted to many different surfaces through the selection of JP floor fibers and can be used almost unlimitedly.

APPLICATION

Depending on the cleaning requirement and surface material, select the appropriate JP surface fiber, press it to the Velcro strips on the wiping plate to attach, and the device is ready to use. If you want to lock the wiping plate in a fixed position, you can do so by using the joint wheel and/or knob.

TIP

You can expand the application possibilities by choosing and combining other handles (see accessories).

The handle has a soft PVC cap (PVC = polyvinyl chloride) at the end. This provides good grip when cleaning at all angle. The opening in the cap allows JP MULTI HERO to be hung in order to save space when storing.

CLEANING INSTRUCTION

All parts of JP MULTI HERO are washable

SIZE / WEIGHT / COLOR

Wiping plate 40 cm x 10 cm / 15.7 x 4 inch

3-part handle up to max. 1.80 m long / 7.7 inch

approx. 250 g / 8.8 oz.
